

CARRIAGE *garage doors*

*From
Robert Bowden, Inc.*

Robert Bowden's new line of steel carriage doors is available in 6 panel designs. They are energy efficient and virtually maintenance free, providing the same look as traditional wood carriage doors, without the upkeep.

Our door is a Windsor Model 775 insulated flush steel door in 8', 9', and 16' sizes. Rot proof PVC board stock is then applied to achieve the carriage style desired. The door is equally attractive on the inside surface - the insulation is not exposed.

Iron strap hinges and handles complete the look.

Qualified installers make it a program you can depend on.

Features

Details Make the Difference

- Tongue and groove joint construction seals and aligns the sections providing a snug, weathertight fit.
- Galvanized steel hinges and self lubricating, rollers are built for a lifetime of smooth acting, quiet operation.
- A solid core of CFC-FREE polystyrene foam bonded between the exterior and interior steel "skins" provided the ultimate in strength and energy efficiency.
